1.1	A Subheading . . . . .	3

# Part I

## A Part Heading

# Chapter 1

## A Main Heading

Most of this example applies to `article` and `book` classes as well as to `report` class. In `article` class, however, the default position for the title information is at the top of the first text page rather than on a separate page. Also, it is not usual to request a table of contents with `article` class.

### 1.1 A Subheading

The following sectioning commands are available:

- part
- chapter
- section
- subsection
- subsubsection
- paragraph
- subparagraph

But note that—unlike the `book` and `report` classes—the `article` class does not have a “chapter” command.
